January

New member to our sales and support team

Anders Glade joined with hands-on technical experience and a strong service mindset. He quickly became an active part of our customer dialogue and industry network activities.

February

New member to our administration team

Stella Damkjær started her apprenticeship at Geopal and is currently completing her office education. We're excited to support her as she continues to develop her skills with us. Almost a year later, she's already well up to speed!

March

Functional safety at the FS Conference '25

Christian Møller took part in the Nordic functional safety community and highlighted how gas detection and functional safety work together to reduce risk and strengthen operational reliability.

March

Staying up to date at our annual ATEX training

Good safety solutions are built on both reliable products and the right knowledge. We therefore take part in regular training, including our annual ATEX course with Tomm Giiff from TNG Engineering, to stay up to date with the latest rules, regulations and best practices.

April

24/7 Service: Now with Parachutes!

On April 1, we launched Geopal Sky Patrol! Our service technicians are taking rapid response to the next level by jumping straight out of helicopters for even faster service calls! ...Or maybe it was just April Fools?

Hosting Dansk Standard committee meeting

We had the pleasure of welcoming Dansk Standard, hosting a committee meeting on explosive atmospheres in relation to the ATEX directives (S-531), focused on sharing knowledge and aligning practices across the industry.

Celebrating Geopal's 40-year anniversary in May

A shared celebration at our new headquarter

In May, we celebrated Geopal's 40-year anniversary in our new facilities in Farum — together with colleagues, customers, partners and friends of Geopal. It was a day filled with good conversations, smiles and gratitude (and a clear reminder that we don't get here alone).

Four decades of experience and development

Geopal was founded in 1985, and over four decades we've grown from a small beginning into a modern company with in-house production and a dedicated team, while keeping our mission the same: creating reliable solutions that help keep people safe at work.

May

New member to our technical department

Marc Falkenberg started at Geopal as a true tech enthusiast with a passion for IoT and electrical engineering, helping strengthen our technical capabilities and curiosity for what's next.

Meeting the industry at the Refrigeration & Heat Pump Forum

Helle Ryssel Clemmensen and Anders Glade joined the dialogue on safe refrigeration systems and how gas detection supports safety when working with refrigerants like ammonia.

June

New members to our service team

Two new technicians, Henrik and Jesper, stepped into our service team supporting installations, calibration, service and commissioning of gas detection systems, across everything from industrial environments to biogas plants and parking facilities.

August

An evening of team spirit at the DHL event

We took part in the DHL event in Copenhagen with runners, walkers and supporters all showing great team spirit. A fun and memorable evening together and a great way to wrap up the summer.

November

Strengthening our international presence

Anders Glade worked alongside our new distributor Innentra at C&R 2025 in IFEMA Madrid, supporting the stand and getting closer to the Spanish and Portuguese markets.

Good conversations at Ajour

Helle Ryssel Clemmensen and Christian Møller represented Geopal at Ajour, where we once again met familiar faces and new contacts for the good technical conversations that move safety forward.

As we wrap up the year, we'd like to say thank you. Thank you to our customers, partners, suppliers and everyone who follows and supports Geopal.

Your trust, collaboration and dialogue are what allow us to keep developing reliable solutions and helping create safer workplaces across many industries.

We look forward to continuing the work together and strengthening safety, supporting our customers and building strong partnerships in the year ahead.

Here's to another year of collaboration, progress and safer workplaces.

All the best,

geopal[®]
