

Blackline Safety G7c

Overview of all detectors

In the Blackline Portal, the responsible person has the ability to:

- View the last used location for each detector
- Configure detectors individually or in groups
- Monitor bump-test and calibration intervals
- Keep track of the number of operational hours per unit
- Set alarm thresholds and man-down function

Real-time display of all detectors' measurement values.

Technical data

Warranty:	2 years
IP rating:	IP 67
Certified:	ATEX Zone 0, 1, 2
Battery life:	18 hours (average) – charges in 4 hours
Size and weight:	Max. 6,6 x 15,0 x 2,7 cm/192 g

Blackline Safety G7c Portable detector

Maximum safety

The Blackline G7c offers maximum safety for employees working alone who may need to quickly contact an emergency center and/or colleagues in case of sudden illness, (fall) accidents, gas leaks, or similar emergencies.

With 4G network and GPS, it is always possible to locate an injured person, and the location of all employees is known in case of evacuation. Available in versions with or without gas detection.

For indoor use, where signal coverage is not possible, a signal booster is offered to maintain precise location tracking.

"Man-Down" function and gas detector

"Man-Down" function combined with gas detector for single gas or up to 5 gases

Detection up to 5 gases

H2S	Hydrogen sulfide
LEL	Explosive gases
CO	Carbon monoxide
O2	Oxygen
CO2	Carbon dioxide
NH3	Ammonia
Cl2	Chlorine

Two-way communication

Two-way voice function via built-in SIM card

Visual confirmation of alarm receipt

Clear display that the alarm has been received by the emergency center and that "help is on the way"

Precise Location

Via built-in GPS

Reporting Module

Configurable

Calibration and bump test overview

Alarm overview, response time, and real-time function

Docking Station

Bump test, calibration, function test, and charging

Alarm Center Management

Via Blackline's central emergency center and/or own team
